PROFESSIONAL SUMMARY

Results-driven Project Management professional and engineer with a B.Tech in Electronics and Computer Engineering, specializing in translating complex business requirements into clear technical specifications for fintech, real estate, and enterprise CRM/ERP platforms. Proven track record managing end-to-end delivery across multiple concurrent, cross-functional projects using Agile/Scrum methodologies, with hands-on experience authoring BRDs, PRDs, and FSDs, conducting structured gap analysis, and driving stakeholder alignment from requirement discovery through release. Growing expertise in AI/ML, large language models, and full-stack development (Python, Django, FastAPI, React), with a strong interest in building intelligent, data-driven tools that streamline project workflows and improve decision-making. Recognized for strong stakeholder communication, KPI-driven process improvement, and the ability to manage competing priorities in fast-paced, deadline-intensive environments.

EXPERIENCE

Techstalwarts — Mumbai, India

Project Management Trainee

Jan 2025 – Present

- Plan, track, and report on the delivery of digital solution projects spanning web, mobile, CRM, ERP, and AI-driven products for multiple concurrent clients, acting as the central point of coordination across engagements.
- Serve as the primary liaison between cross-functional technical teams (development, QA, design) and business stakeholders, ensuring on-time delivery and continuous alignment with project objectives and scope.
- Author and maintain comprehensive project documentation, including project timelines, resource allocation charts, risk registers, and weekly status reports circulated to leadership and client stakeholders.
- Monitor KPIs and delivery metrics across active projects, identifying bottlenecks early and proposing actionable process improvements that increased overall delivery efficiency by 15%.
- Facilitate sprint planning, daily stand-ups, and other agile ceremonies, contributing to backlog refinement, sprint reviews, and retrospectives to steadily improve team velocity and delivery predictability.

GetKredit — Consultant, Client Engagement

Project Management & Business Analysis

Jan 2025 – Present (Ongoing)

- Drive end-to-end project management for GetKredit, a real estate CRM and financing platform, from requirements gathering through release, coordinating closely across product, engineering, and client stakeholders.
- Author and iterate on Business Requirement Documents (BRDs), Product Requirement Documents (PRDs), and Functional Specification Documents (FSDs) covering core modules including Approved Project Finance (APF), Dashboard, CIBIL profiling, and Accounts & Billing.
- Maintain Jira boards for sprint tracking, backlog grooming, and progress visibility across roughly 10 sprints and 85+ submodules, tracked through a structured, seven-sheet Excel project tracker.
- Conduct structured gap analysis to align product requirements with implementation, incorporating iterative feedback from multiple client-side reviewers into successive BRD and PRD versions (e.g., BRD v2.1).
- Lead requirement definition for the telesales/tele-calling feature, including lead assignment workflows, Mcube telephony integration, in-platform notification rules, and a Senior Intervention escalation workflow.

Cstore ERP

Project Management Trainee

Apr 2025 – Jan 2026

- Managed the Cstore ERP project as Project Management Trainee, overseeing the full project lifecycle from initial planning and requirement finalization through completion and go-live.
- Set up and maintained Jira boards for task tracking, sprint planning, and progress visibility, ensuring transparency for both internal delivery teams and client stakeholders.
- Performed structured gap analysis to surface mismatches between business expectations and system capabilities, informing corrective action plans and scope adjustments.
- Coordinated closely with development and QA teams to prioritize defect resolution and feature enhancements ahead of key delivery milestones.

Centrum Capital

Project Management Trainee

Mar 2025 – Sep 2025

- Led end-to-end project management from initiation to completion, driving delivery of the Centrum Fixed Deposit & Recurring Deposit digital platform.
- Created and maintained Jira boards to track sprints, backlog items, and task progress across the full project lifecycle, from discovery through launch.
- Conducted gap analysis to identify process and requirement mismatches, aligning final deliverables with stakeholder expectations and business needs.
- Collaborated with cross-functional engineering and design teams to ensure timely resolution of open issues ahead of platform launch.

PROJECTS

PM AI Agent — Multi-Agent Project Management Assistant

Mar 2026

LangChain · Llama.cpp · ChromaDB · RAG · SQLite · Streamlit

- Designed and built a local-first multi-agent AI assistant using LangChain to orchestrate four specialized agents — Planner, Scheduler, Reporter, and Comms — each handling distinct PM workflows such as task creation, deadline tracking, report generation, and stakeholder messaging.
- Developed a Retrieval-Augmented Generation (RAG) pipeline backed by ChromaDB to retrieve contextually relevant information from BRDs, technical specifications, and meeting notes, enabling grounded and accurate agent responses.
- Designed an offline-capable architecture allowing the system to function without internet connectivity, with persistent conversation history stored in SQLite for continuity across sessions.
- Built an interactive Streamlit dashboard for real-time agent interaction, supporting natural language queries for project status, risk flags, and action item summaries.

Financial Document Management System with RAG

2025

FastAPI · Qdrant · BGE-small-en-v1.5 · JWT · RBAC · Streamlit

- Built a secure financial document management platform using FastAPI with JWT-based authentication and role-based access control (RBAC) to enforce document-level permissions.
- Implemented a retrieval pipeline using Qdrant as the vector store and BGE-small-en-v1.5 embeddings to enable fast, accurate semantic search over financial documents.
- Developed a companion Streamlit client interface, allowing users to upload, query, and manage documents through a simple conversational front end.

Language Identification & Emotion Detection Web App

Feb 2026

Python · Django · HTMX · XLM-RoBERTa

- Built a full-stack web application using Django and HTMX for real-time multilingual text classification and emotion detection, delivering a seamless, no-reload user experience.
- Fine-tuned and deployed an XLM-RoBERTa transformer model, achieving 92% accuracy across 100+ languages with support for 7 distinct emotion categories.

IPL Data Analysis Platform

Nov 2024

Python · Pandas · NumPy · Matplotlib · Seaborn

- Performed in-depth exploratory data analysis on 16 seasons of IPL data, uncovering patterns in team performance, venue advantages, toss impact, and player consistency metrics.
- Engineered features for auction strategy recommendations and visualized insights through 20+ charts and heatmaps to support data-driven decision-making.

Food Image Recognition with Recipe Generation

Mar 2024

Python · TensorFlow · T5 · Flask

- Built an end-to-end deep learning application combining EfficientNet-B1 (85% accuracy) for food classification with a T5 transformer for dynamic recipe generation.
- Deployed the model via a Flask REST API with a responsive web interface supporting drag-and-drop image uploads and instant recipe output.

TECHNICAL SKILLS

Languages: Python, C++, SQL

Frameworks & Tools: Django, Flask, HTMX, FastAPI, LangChain, LlamaIndex, React, Docker, Git, GCP

AI / ML: PyTorch, TensorFlow, scikit-learn, RAG, LLMs, ChromaDB, Qdrant, pgvector, Ollama, Hugging Face Transformers

Data & Analytics: Power BI, DAX, Power Query M, Excel (advanced), Pandas, NumPy, Matplotlib, Seaborn

Databases: PostgreSQL, MySQL, MongoDB, SQLite

PM Tools & Practices: Agile/Scrum, Jira, Risk Assessment, Stakeholder Communication, KPI Monitoring, Project Documentation (BRD/PRD/FSD), Gap Analysis

EDUCATION

Amrita School of Engineering — Kollam, Kerala

B.Tech, Electronics and Computer Engineering

2020 – 2024

CGPA: 7.4 / 10

CERTIFICATIONS

- Data Science Specialization — Techpaathshala (Completed: May 2025)
- Data Structures and Algorithms in Python — Udemy (May 2024)
- Google Cloud Fundamentals: Core Infrastructure — Coursera (May 2022)
