EXPERIENCE

Techstalwarts

Mumbai, India

Project Management Trainee

Ongoing

- Assisted in planning, tracking, and reporting multiple digital solution projects across diverse domains.
- Improved communication flow between technical teams and non-technical stakeholders, ensuring clarity and timely updates.
- Created detailed project documentation including timelines, resource allocation charts, and risk assessments.
- Monitored project KPIs and proposed actionable insights to improve delivery efficiency by 15%.
- Collaborated with cross-functional teams to ensure smooth deployment of software releases.

EDUCATION

Amrita School of Engineering

Kollam, Kerala

B.Tech in Electronics and Computer Engineering (CGPA: 7.4)

2024

SIES College of Arts, Science & Commerce

Mumbai, India

12th Maharashtra Boards (78.48%)

2020

St. Joseph's High School

Mumbai, India

10th Maharashtra Boards (84.4%)

2018

PROJECTS

IPL Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn*

November 2025

- Performed extensive Exploratory Data Analysis (EDA) on IPL match datasets spanning 16 seasons to identify winning patterns and team consistency.
- Engineered features to analyze player performance stability, identifying top-performing players for auction strategy recommendations.
- Derived actionable insights regarding "chasing vs. defending" bias at specific venues, providing data-driven inputs for match strategy.

Northwind Data Analysis Using Power BI | *Power BI, DAX, Power Query*

February 2025

- Analyzed Northwind dataset to uncover key insights on customer segments, regional sales, and product performance.
- Created an interactive dashboard revealing seasonal trends; identified that Q4 sales were 40% higher than the yearly average.

Food Image Analysis with Recipe Generation | *Python, TensorFlow, NLP (T5)*

March 2024

- Built a model to identify food items using CNNs (EfficientNet-B1) and generate cooking recipes using NLP techniques.
- Achieved 85% classification accuracy and built a user-friendly interface for interaction.

TECHNICAL SKILLS

Languages: Python, C++, SQL

Tools: GCP, Docker, Kubernetes, TensorFlow, Power BI, OpenCV

Libraries: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, Pytorch, Google-adk

Domains: IoT, Computer Vision, NLP, Cloud Infrastructure

CERTIFICATIONS

Data Science: Techpaathshala (Ongoing)

DSA in Python: Udemy (May 2024)

Google Cloud Fundamentals: Core Infrastructure, Coursera (May 2022)
